In July 2009, our head office was hit with a massive fire that took out our IT systems and all of our radio communication with about 1,600 vehicles. It was nothing short of devastating.

Fortunately for us, we had engaged This Solution some six months earlier to assist us with our IT requirements. Within eight hours of the blaze, they had us communicating with our cars again! Since then, they have designed, provisioned and continue to support our IT infrastructure, which of course, must be 100% reliable 24/7.

Our system processes 7 million batches of data each day and Paul and his team have done an amazing job of managing the technology that handles it. We no longer require any internal IT staff - This Solution is quite literally our vCIO.

Anthony Gorman
Technology and Communications Systems Manager
